

Early Years Kindergarten Program at Planeta Educar

Welcome to the Early Years Kindergarten Program at Planeta Educar! Our program is designed to provide a nurturing and stimulating environment for children aged 18 months to 5 years.

At Planeta Educar, we believe in fostering a love for learning and exploration in our young learners, laying a solid foundation for their future academic success.

In our Early Years Kindergarten Program, children will engage in a wide range of age-appropriate activities and experiences that promote holistic development across various domains. Here's what they will learn:

Social and Emotional Development: Through group activities, free play, and structured interactions, children will learn essential social skills such as sharing, taking turns, and problem-solving. Our caring educators provide a supportive environment where children feel safe to express themselves and develop positive relationships with their peers.

Language/ Communication / writing: We focus on building language skills through storytelling, songs, rhymes, and interactive conversations. Children are encouraged to express themselves verbally and non-verbally, expanding their vocabulary and enhancing their communication skills.

Our program focuses on developing linguistic skills and written expression in children. We provide a stimulating and encouraging environment where children explore the richness of written language and develop their own ability to communicate effectively:

- **Learning Letters and Sounds:** We introduce children to the alphabet and basic sounds of the language. Through fun and interactive activities, they learn to recognize and name letters, as well as associate sounds with written symbols.
- **Word and Sentence Formation:** Children then progress to forming simple words and sentences. They practice writing familiar words and short phrases, developing their ability to use written language to communicate ideas and information.
- **Exploring Reading:** We encourage children to discover the joy of reading through engaging stories and books tailored to their reading level. They develop their understanding of narrative structure, vocabulary, and reading fluency.
- **Handwriting Practice:** We also teach children the importance of handwriting. Through letter formation exercises and handwriting practice, they develop fine motor skills and the ability to produce legible and fluent writing.

By focusing on language and writing, we prepare children to become competent and confident communicators. We believe that mastering these skills is essential for their future success in all areas of life.

Cognitive Development: Our curriculum includes hands-on activities that promote cognitive development, such as puzzles, sorting games, and sensory exploration. Children will learn to think critically, make observations, and solve problems independently, laying the groundwork for future academic success.

Fine and Gross Motor Skills: Through a variety of indoor and outdoor activities, children will develop their fine and gross motor skills. From painting and drawing to outdoor play and physical exercises, our program encourages children to explore and master their physical abilities in a supportive and encouraging environment.

Creativity and Imagination: We value the importance of creativity and imagination in early childhood development. Our program includes opportunities for artistic expression, imaginative play, and creative exploration, allowing children to unleash their creativity and express themselves freely.

At Planeta Educar, we are committed to providing a high-quality early childhood education experience that nurtures the unique talents and abilities of each child. Our Early Years Kindergarten Program is designed to instill a lifelong love for learning, preparing children for a successful transition to primary school and beyond. Join us at Planeta Educar and embark on an exciting educational journey where every child's potential is nurtured and celebrated!
